EDUCATION

Jagiellonian University — Kraków, Poland
BSc in Cognitive Science — Expected June 2027

- Thesis (in progress): human-AI interaction, how people perceive and relate to AI systems.
- Relevant coursework: Research Methods, Human-Computer Interaction, Statistical Analysis, UX Design.

EXPERIENCE

Ideacto — Remote
UX Research & Analytics Intern — Oct 2026 – Dec 2026 (expected)

- Carry out research and analytical tasks for client projects, including competitor analysis for a B2B software client.
- Design AI-supported workflows for UX analysis and research, grounded in UX literature and industry best practices, to speed up team work while keeping every output under human review.

Fundacja Kompetencji Cyfrowych (Digital Competence Foundation) — Remote
UX Researcher (volunteer), "Strona od Nowa": free website redesigns for NGOs — Feb 2026 – Present

- Planned and ran a qualitative interview study with NGOs in a four-person research team: wrote the research plan and interview scenario, ran the interviews and turned findings into recommendations for the board.
- Analysed Google Search Console data for an NGO client before its website redesign and found that two thirds of search traffic came from the founder's name and none from the target audience; presented findings to the client and team.
- Supported a cross-functional team of UX/UI designers and developers with research ops (consent forms, recruitment) and design QA of website builds.

Omniviser — Remote
Junior AI Engineer — Nov 2025 – Apr 2026

- Worked on a client-facing LLM-powered application for US clients, improving conversational flows and chatbot responses to match user needs, and tested AI features with cross-functional teams (Azure DevOps CI/CD).

AI Engineering Intern — Aug 2025 – Nov 2025

- Contributed to an open-source AI orchestration initiative used in production; promoted to Junior AI Engineer after three months.

RESEARCH PROJECTS

Group Trip Planner (MIGO), UX course project, Jagiellonian University — 2026

- Ran a survey of 21 young travellers with participatory feature ranking; designed a six-screen Figma prototype around the top-ranked features.
- Co-moderated 4 think-aloud usability tests (19 of 20 tasks completed unaided) and identified the key friction point: vote counts without names, matching the top pain point from the survey.

FOMO and Sleep Quality, academic study, Jagiellonian University — 2025

- Designed and ran a quantitative pre-post intervention study ($N = 30$) with validated scales; found FOMO correlated with worse sleep ($r = .38$, $p = .039$) and that emotion regulation did not moderate the effect.

LEADERSHIP & ACTIVITIES

Google Student Mentoring Program — Warsaw, Poland
Mentee, one of 20 participants selected nationwide — Sep 2025 – Dec 2025

Tech Leaders Mentoring Program — Remote
Mentee, UX Research & AI track — Feb 2026 – May 2026

Volunteer Fire Brigade — Poland
Active Member — Jun 2022 – Present

- Won 1st place in the women's team category of municipal and county firefighting competitions three times.

SKILLS

Research: qualitative and quantitative user research, user interviews, usability testing, think-aloud, survey design, synthesis, research ops

Data & analytics: statistics in R and Python (pandas, NumPy, Matplotlib), Google Search Console, Google Analytics

AI: LLM product evaluation, prompt design, conversational UX, AI-assisted research workflows with human verification

Tools: Figma, Miro, Notion, Jira, ClickUp, Git

Languages: Polish (native), English (C1, Cambridge C1 Advanced, 198/210)
